Ronald Vidor, SOC: One operator, many talents!

Ronald Vidor is a world class "A" list camera operator. He also specializes in every rank of cinematography, including Steadicam, underwater and aerial cinematography. His credits range from JAWS to scores of other films that include some of the finest actors, directors, producers and cinematographers in the craft: Steven Spielberg, Mel Gibson, Aaron Spelling, Conrad Hall and a myriad of others.

With Ronald Vidor, you get the most out of one DP!

Ronald Vidor's greatest asset is that he's able and willing to swing from one position to another on any given shoot; this allows the production company to get the most out of his abilities: "A" camera operator, Steadicam, underwater, aerial, Second Unit DP and even First Unit DP if called upon.

Increase your film's production value and "Look"!

The addition of Steadicam, underwater and aerial cinematography to a production can add a lot of dimension to it, easily increasing its production value and "look". With Ronald Vidor, you have the option of shooting underwater scenes one day, aerials the next, Steadicam scenes the following day and then utilize him as a Second Unit DP the next -- all while having him on set as the "A" list camera operator if needed. Ronald Vidor believes in doing whatever it takes to get the job done!

One rate for several talents!

Hire Ronald Vidor at his standard rate and you get all his talents: "A" list camera operator, Steadicam, aerial, underwater and/or Second Unit DP. There's no additional charge for utilizing him in different positions on the same shoot. You may only need a Steadicam and/or "A" list camera operator for now, but it's great assurance knowing there's someone on set that can swing into action in other camera positions if called upon.

Top-of-the-line equipment!

Ronald Vidor owns a complete, top-of-the-line Steadicam rig (with numerous bells and whistles and accessories) and also much of the equipment needed for underwater and aerial cinematography. With Ronald Vidor, one call takes care of all your Steadicam, aerial, underwater and camera operator needs!
